Best of Breed & Best of Opposite Sex

AMERICAN KENNEL CLUB SCHEDULE OF POINTS

The Points toward a Championship shall be awarded to the Winners Dog and Bitch of each breed or variety based on the actual number of dogs or bitches competing in that variety.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Variety, the dogs of both sexes that have been entered for Best of Variety competition and that have been defeated in such competition, shall be counted in addition to the dogs that completed in the regular classes for its sex in calculating championship points.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Opposite Sex to Best of Variety, the dogs of its own sex that have been entered for Best of Variety competition that have been defeated in competition for Best of Opposite Sex, shall be counted in addition to the dogs that completed in the regular classes for its sex in calculating championship points.

After points have been computed for Winners Dog and Winners Bitch subject to the above two stipulations, the dog awarded the Best of Winners shall be credited with the number of points calculated for Winners Dog or Winners Bitch, whichever is greater.

In counting the number of eligible dogs in competition, a dog that is disqualified, or that is dismissed, excused or ordered from the ring by the judge, or from which all awards are withheld shall not be included. Any dog which shall have won fifteen points shall become a Champion of Record, if six or more of said points shall have been won at two shows with a rating of three or more championship points each and under two different judges, and some one or more of the balance of said points shall have been won under some other judge or judges than the two judges referred to above.

At independently held specialty shows for breeds divided into recognized varieties, if a dog designated Winners in its variety is also awarded Best of Breed in inter-variety competition, it shall receive championship points figured at the highest point rating of any variety entered at that specialty show.

If a dog designated Winners in its variety is also awarded the Best of Opposite Sex to Best of Breed in inter-variety competition, it shall receive championship points figured at the highest point rating of any dog of its sex of any variety entered at that specialty show.

Grand Championship points may be recorded for: Best of Breed or Best of Variety of Breed, Best of Opposite Sex to Best of Breed or Best of Variety of Breed, Select Dog and Select Bitch. Grand Championship points will be recorded according to the number of eligible dogs competing in the regular classes of each breed or variety, as well as dogs entered in Best of Breed competition, according to the Schedule of Points established by the Board of Directors.

Grand Championship points for a dog awarded Best of Breed or Best of Variety of Breed shall count all eligible dogs of both sexes entered in Best of Breed or Best of Variety of Breed competition in addition to the dogs that competed in the regular classes for both sexes in calculating Grand Championship points.

Grand Championship points for a dog awarded Best of Opposite Sex to Best of Breed or Best of Variety of Breed shall count all eligible dogs of their sex competing in Best of Breed or Best of Variety of Breed competition in addition to the dogs that competed in the regular classes for their sex in calculating Grand Championship points.

Grand Championship points for a dog awarded Select Dog or Select Bitch shall count all eligible dogs of their sex defeated in Best of Breed or Best of Variety of Breed competition in addition to the dogs that competed in the regular classes for their sex in calculating Grand Championship points.

Official Standard of the Dachshund

General Appearance

Low to ground, long in body and short of leg, with robust muscular development; the skin is elastic and pliable without excessive wrinkling. Appearing neither crippled, awkward, nor cramped in his capacity for movement, the Dachshund is well-balanced with bold and confident head carriage and intelligent, alert facial expression. His hunting spirit, good nose, loud tongue and distinctive build make him well-suited for below-ground work and for beating the bush. His keen nose gives him an advantage over most other breeds for trailing. NOTE: Inasmuch as the Dachshund is a hunting dog, scars from honorable wounds shall not be considered a fault.

Size, Proportion, Substance

Bred and shown in two sizes, standard and miniature; miniatures are not a separate classification but compete in a class division for "11 pounds and under at 12 months of age and older." Weight of the standard size is usually between 16 and 32 pounds.

Head

Viewed from above or from the side, the head tapers uniformly to the tip of the nose. The eyes are of medium size, almond-shaped and dark-rimmed, with an energetic, pleasant expression; not piercing; very dark in color. The bridge bones over the eyes are strongly prominent. Wall eyes, except in the case of dappled dogs, are a serious fault. The ears are set near the top of the head, not too far forward, of moderate length, rounded, not narrow, pointed, or folded. Their carriage, when animated, is with the forward edge just touching the cheek so that the ears frame the face. The skull is slightly arched, neither too broad nor too narrow, and slopes gradually with little perceptible stop into the finely-formed, slightly arched muzzle, giving a Roman appearance. Lips are tightly stretched, well covering the lower jaw. Nostrils well open. Jaws opening wide and hinged well back of the eyes, with strongly developed bones and teeth. Teeth – Powerful canine teeth; teeth fit closely together in a scissors bite. An even bite is a minor fault. Any other deviation is a serious fault.

Neck

Long, muscular, clean-cut, without dewlap, slightly arched in the nape, flowing gracefully into the shoulders without creating the impression of a right angle.

Trunk

The trunk is long and fully muscled. When viewed in profile, the back lies in the straightest possible line between the withers and the short, very slightly arched loin. A body that hangs loosely between the shoulders is a serious fault. Abdomen – Slightly drawn up.

Forequarters

For effective underground work, the front must be strong, deep, long and cleanly muscled. Forequarters in detail: Chest – The breast-bone is strongly prominent in front so that on either side a depression or dimple appears. When viewed from the front, the thorax appears oval and extends downward to the mid-point of the forearm. The enclosing structure of the well-sprung ribs appears full and oval to allow, by its ample capacity, complete development of heart and lungs. The keel merges gradually into the line of the abdomen and extends well beyond the front legs. Viewed in profile, the lowest point of the breast line is covered by the front leg. Shoulder blades – long, broad, well-laid back and firmly placed upon the fully developed thorax, closely fitted at the withers, furnished with hard yet pliable muscles. Upper Arm – Ideally the same length as the shoulder blade and at right angles to the latter, strong of bone and hard of muscle, lying close to the ribs, with elbows close to the body, yet capable of free movement.

Forequarters

Forearm – Short; supplied with hard yet pliable muscles on the front and outside, with tightly stretched tendons on the inside and at the back, slightly curved inwards. The joints between the forearms and the feet (wrists) are closer together than the shoulder joints, so that the front does not appear absolutely straight. The inclined shoulder blades, upper arms and curved forearms form parentheses that enclose the ribcage, creating the correct "wraparound front." Knuckling over is a disqualifying fault. Feet – Front paws are full, tight, compact, with well-arched toes and tough, thick pads. They may be equally inclined a trifle outward. There are five toes, four in use, close together with a pronounced arch and strong, short nails. Front dewclaws may be removed.

Hindquarters

Strong and cleanly muscled. The pelvis, the thigh, the second thigh, and the rear pastern are ideally the same length and give the appearance of a series of right angles. From the rear, the thighs are strong and powerful. The legs turn neither in nor out. Rear pasterns – Short and strong, perpendicular to the second thigh bone. When viewed from behind, they are upright and parallel. Feet – Hind Paws – Smaller than the front paws with four compactly closed and arched toes with tough, thick pads. The entire foot points straight ahead and is balanced equally on the ball and not merely on the toes. Rear dewclaws should be removed. Croup – Long, rounded and full, sinking slightly toward the tail. Tail – Set in continuation of the spine, extending without kinks, twists, or pronounced curvature, and not carried too gaily.

Gait

Fluid and smooth. Forelegs reach well forward, without much lift, in unison with the driving action of hind legs. The correct shoulder assembly and well-fitted elbows allow the long, free stride in front. Viewed from the front, the legs do not move in exact parallel planes, but incline slightly inward. Hind legs drive on a line with the forelegs, with hock joints and rear pasterns (metatarsus) turning neither in nor out. The propulsion of the hind leg depends on the dog's ability to carry the hind leg to complete extension. Viewed in profile, the forward reach of the hind leg equals the rear extension. The thrust of correct movement is seen when the rear pads are clearly exposed during rear extension. Rear feet do not reach upward toward the abdomen and there is no appearance of walking on the rear pasterns. Feet must travel parallel to the line of motion with no tendency to swing out, cross over, or interfere with each other. Short, choppy movement, rolling or high-stepping gait, close or overly wide coming or going are incorrect. The Dachshund must have agility, freedom of movement, and endurance to do the work for which he was developed.

Temperament

The Dachshund is clever, lively and courageous to the point of rashness, persevering in above- and below-ground work, with all the senses well-developed. Any display of shyness is a serious fault.

Special Characteristics of the Three Coat Varieties –

The Dachshund is bred with three varieties of coat: (1) Smooth; (2) Wirehaired; (3) Longhaired and is shown in two sizes, standard and miniature. All three varieties and both sizes must conform to the characteristics already specified. The following features are applicable for each variety:

Smooth Dachshund – Coat –

Coat-Short, smooth and shining. Should be neither too long nor too thick. Ears not leathery. Tail - Gradually tapered to a point, well but not too richly haired. Long sleek bristles on the underside are considered a patch of strong-growing hair, not a fault. A brush tail is a fault, as is also a partly or wholly hairless tail. Color of Hair-Although base color is immaterial, certain patterns and basic colors predominate. One-colored Dachshunds include red and cream, with or without a shading of interspersed dark hairs. A small amount of white on the chest is acceptable, but not desirable.

Nose and nails-black. Two-colored Dachshunds include black, chocolate, wild boar, gray (blue) and fawn (Isabella), each with deep, rich tan or cream markings over the eyes, on the sides of the jaw and under lip, on the inner edge of the ear, front, breast, sometimes on the throat, inside and behind the front legs, on the paws and around the anus, and from there to about one-third to one-half of the length of the tail on the underside. Undue prominence of tan or cream markings is undesirable. A small amount of white on the chest is acceptable but not desirable. Nose and nails-in the case of black dogs, black; for chocolate and all other colors, dark brown, but self-colored is acceptable.

Dappled Dachshunds – The dapple (merle) pattern is expressed as lighter-colored areas contrasting with the darker base color, which may be any acceptable color. Neither the light nor the dark color should predominate. Nose and nails are the same as for one- and two-colored Dachshunds. Partial or wholly blue (wall) eyes are as acceptable as dark eyes. A large area of white on the chest of a dapple is permissible. Brindle is a pattern (as opposed to a color) in which black or dark stripes occur over the entire body although in some specimens the pattern may be visible only in the tan points.

Piebald is a pattern (as opposed to a color) with clearly defined areas and/or patches of white on any allowed one-colored or two-colored dogs. Two-colored piebald patterned dogs may show tan markings on the face and around the anus. There are no patches of lighter shadings within the colored areas as in the dapple pattern. Ticking in the white areas is acceptable. Eye color, eye rims, nose and lips are well pigmented and in accordance with the base color; eyes are never partially or wholly blue as distinguished from the dapple pattern. Eyes partially or wholly blue is a disqualification. Head must not be more than 50 percent white and color(s) other than white must cover both ears, back and front, and extend without interruption from the ears over both eyes. A head of more than 50 percent white or white on any portion of either ear, back or front, or around the eyes is a disqualification. Pure white dogs with no body spots except on the head are to be disqualified. Nails may be partially or wholly white.

Sable – the sable pattern consists of a uniform dark overlay on red dogs. The overlay hairs are double-pigmented, with the tip of each hair much darker than the base color. The pattern usually displays a widow's peak on the head. Nose, nails and eye rims are black. Eyes are dark, the darker the better.

Colors or patterns other than those specified above are a disqualification.

Wirehaired Dachshunds – Coat –

With the exception of jaw, eyebrows, and ears, the whole body is covered with a uniform tight, short, thick, rough, hard outer coat but with finer, somewhat softer, shorter hairs (undercoat) everywhere distributed between the coarser hairs. The absence of an undercoat is a fault. The distinctive facial furnishings include a beard and eyebrows. On the ears the hair is shorter than on the body, almost smooth. The general arrangement of the hair is such that the wirehaired Dachshund, when viewed from a distance, resembles the smooth. Any sort of soft hair in the outercoat, wherever found on the body, especially on the top of the head, is a fault. The same is true of long, curly, or wavy hair, or hair that sticks out irregularly in all directions. Tail – Robust, thickly haired, gradually tapering to a point. A flag tail is a fault. Color of Hair – While the most common colors are wild boar, black and tan, and various shades of red, all colors and patterns listed above are admissible.

Wild boar (agouti) appears as banding of the individual hairs and imparts an overall grizzled effect which is most often seen on wirehaired Dachshunds, but may also appear on other coats. Tan points may or may not be evident. Variations include red boar and chocolate-and-tan boar. Nose, nails and eye rims are black on wild-boar and red-boar Dachshunds. On chocolate-and tan-boar Dachshunds, nose, nails, eye rims and eyes are self-colored, the darker the better.

A small amount of white on the chest, although acceptable, is not desirable. Nose and nails same as for the smooth variety.

Longhaired Dachshund – Coat –

The sleek, glistening, often slightly wavy hair is longer under the neck and on fore chest, the underside of the body, the ears and behind the legs. The coat gives the dog an elegant appearance. Short hair on the ear is not desirable. Too profuse a coat which masks type, equally long hair over the whole body, a curly coat, or a pronounced parting on the back are faults. Tail – Carried gracefully in prolongation of the spine; the hair attains its greatest length here and forms a veritable flag. Color of Hair – Same as for the smooth Dachshund. Nose and nails – same as for the smooth. The foregoing description is that of the ideal Dachshund. Any deviation from the above described dog must be penalized to the extent of the deviation keeping in mind the importance of the contribution of the various features toward the basic original purpose of the breed.

Disqualifications:

Knuckling over of front legs.

In the piebald pattern:

- *eyes partially or wholly blue, or*
- *a head of more than 50 percent white, or*
- *white covering any portion of the ears, back and front, or around the eyes, or*
- *pure white with no body spots except on the head.*
- *Colors or patterns other than those specified above.*

Approved November 14, 2017

Effective January 1, 2018

The only choice for champions for over 20 years.

The advertisement features a central image of a brown dachshund dog running happily towards the camera. The background is a soft-focus green, suggesting an outdoor setting. The text is overlaid on the image: 'For people who love' in a simple serif font, followed by 'quality' in a large, elegant blue script font. At the bottom, a dark blue horizontal band contains the name 'Chris Christensen.' in white script, with 'The only choice for champions for over 20 years.' in a smaller white serif font below it.
